

FACILITIES AND ADMINISTRATION COSTS FOR PILOT AND FEASIBILITY PROJECTS POLICY

Date: April 3, 2020

Version: 1

Subject: Porphyrias Consortium F&A Policy for Pilot Projects

From: Porphyrias Consortium Administration

The Pilot and Feasibility (P&F) funds available through the Porphyria Consortium (PC) may be subject to Facilities and Administration (F&A) costs associated with the participating institution. These P&F funds are provided to recipient investigators to initiate training and pilot projects within the scope of activities supported by the PC. Since these funds are viewed as training funds the PC is following federal training grant guidelines and as such these awards carry a maximum F&A rate of 8%. Institutions wishing to support trainees and junior investigators through the use of this program agree that the maximum F&A rate charged to recipients of awards at applicant institutions will be 8%.
